# The concept of development

- Multiple meanings
- Complex
- Contested
- Ambiguous
- Elusive

# The concept of development (according to Myrdal)

- "By **development** I mean **the movement upward of the entire social system**, and I believe this is the only logically tenable definition. This social system encloses, besides the so-called economic factors, all noneconomic factors, including all sorts of consumption by various groups of people; consumption provided collectively; educational and health facilities and levels; the distribution of power in society; and more generally economic, social, and political stratification; broadly speaking, institutions and attitudes. [...]  
This social system may stay stagnant, or it may move upward or downward."

• From Myrdal, Gunnar. 1974. "What Is Development?." *Journal Of Economic Issues* 8 (4): 729-730.

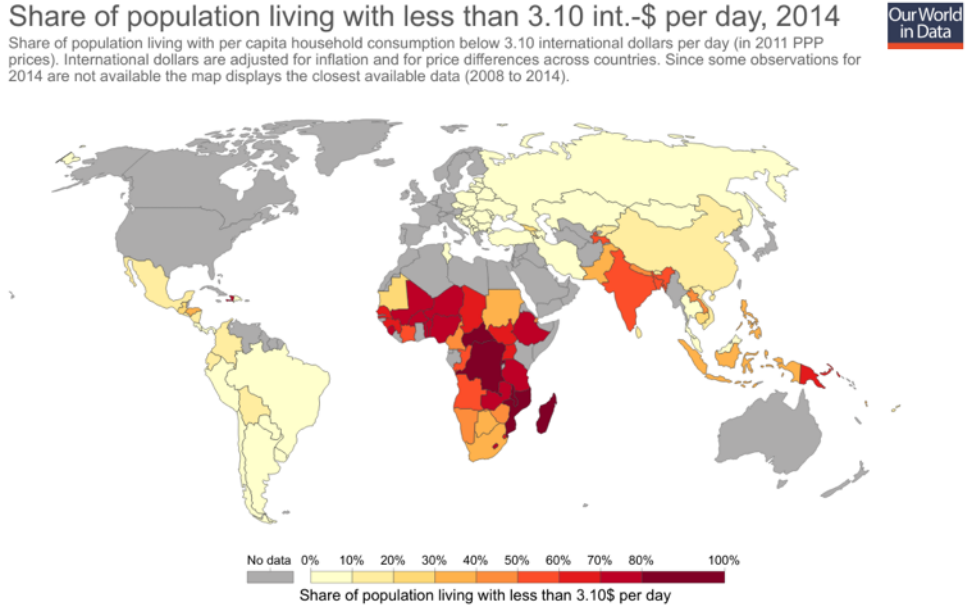

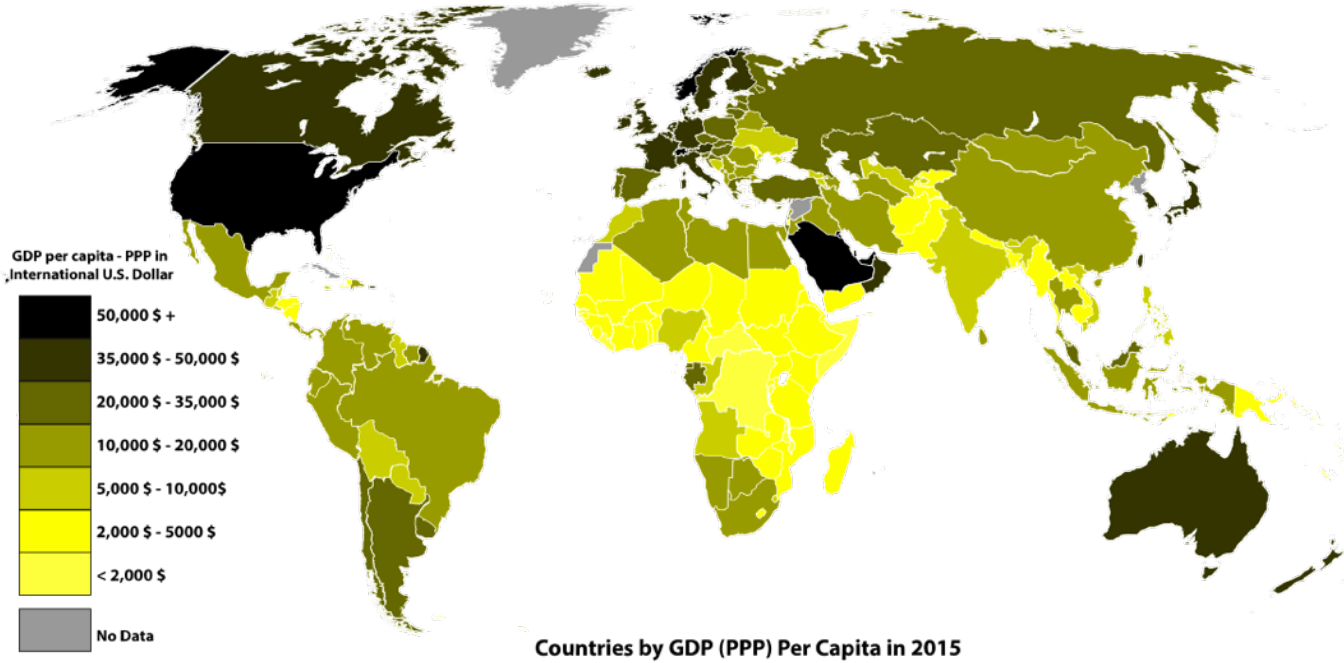

# The concept of development (according to Myrdal)

- Economic factors
- Noneconomic factors:
  - Consumption
  - Education
  - Health
  - Distribution of power
  - Economic, social, and political stratification
  - Institutions

How can development be  
measured?

# Development as the lack of poverty

Source: Poverty - WORLD BANK (WDI - 2017/02) OurWorldInData.org/extreme-poverty/ • CC BY-SA  
Note: Consumption per capita is the preferred welfare indicator for the World Bank's analysis of global poverty. However, for about 25% of the countries, estimates correspond to income, rather than consumption.

# Development as economic growth

What are the disadvantages of focusing on the economic aspect of development?

# Human development

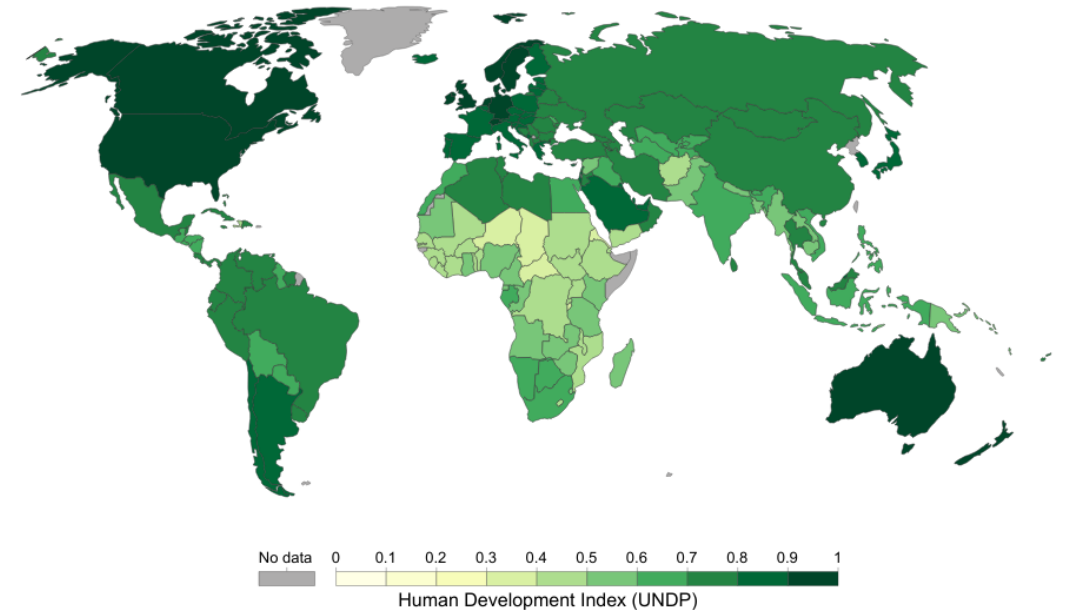

- Mushtaq Khan: development as the process of widening people's choices and the level of wellbeing they achieve
- Human Development Index:
  - Life expectancy
  - Educational attainment
  - Real GDP per capita

Mahbub ul Haq

## Human Development Index, 2014

The Human Development Index (HDI) is a summary measure of average achievement in key dimensions of human development: a long and healthy life, being knowledgeable and having a decent standard of living. The HDI is the geometric mean of normalized indices for each of the three dimensions.

Source: Human Development Index (UNDP)

What do these measures of  
development miss?

# Politics of development

- Political development:  
“Change over time in political institutions”
  - Fukuyama, Francis. 2014. *Political Order and Political Decay*. New York: Farrar, Straus, and Giroux.

What are institutions?

# Institutions

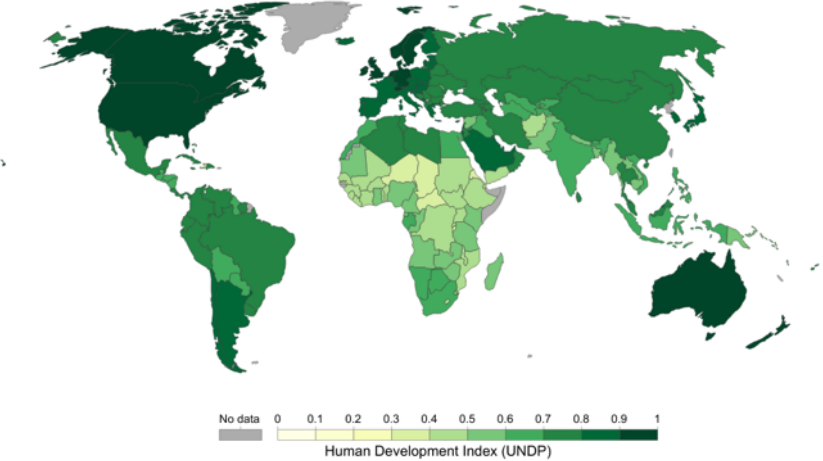

- “Stable, valued, recurring patterns of behavior”
  - Huntington, Samuel. 1968. *Political Order in Changing Societies*. New Haven, Connecticut, United States: Yale University Press.
- “Humanly devised constraints that structure political, economic, and social interaction”
  - North, Douglass. 1990. *Institutions, Institutional Change and Economic Performance*. Cambridge: Cambridge University Press.
- “*First*, an institution is a set of rules that structure social interactions in particular ways. *Second*, for a set of rules to be an institution, knowledge of these rules must be shared by the members of the relevant community or society.”
  - Knight, Jack. 1992. *Institutions and Social Conflict*. Cambridge: Cambridge University Press.

## Neoliberalism - the ideology at the root of all our problems

Financial meltdown, environmental disaster and even the rise of Donald Trump - neoliberalism has played its part in them all. Why has the left failed to come up with an alternative?

# Recent trends

## Share of the world population living in extreme poverty, 1981 to 2030

Share of population living in below the International Poverty Line (1.90 International Dollars). Figures account for cross-country differences in prices levels, as well as for inflation. Projection for 2030 is based on the assumption that the average growth rates of consumption in all countries will be the same as the observed average growth rates from the previous 10 years.

Source: Poverty headcount 1981-2030 - PovcalNet World Bank

Note: The projected figure for 2030 also assumes that the dispersion in the distribution of consumption in each country remains unchanged from the most recent available data.

# Who have been the winners and losers of globalization according to Milanović?

## To Understand 2016's Politics, Look at the Winners and Losers of Globalization

An interview with economist Branko Milanovic.

By **VINCENT BEVINS**

December 20, 2016

✓ Add to Pocket

*Since the 1980s, the world has been undergoing a particular type of globalization, one that has been very good for some people, and not so good for others. Branko Milanovic's book [Global Inequality](#), which came out earlier this year, showed who won and lost under this system in the last 30 years. By doing so, he pinpointed, many believe, a source of discontent that has increasingly shaped our political climate, from the UK's move to leave the EU to the [outcome of the United States presidential election](#).*

# Recent trends

## Global income distribution in 1800, 1975, and 2010 Our World in Data

Income is measured by adjusting for price changes over time and for price differences between countries (purchasing power parity (PPP) adjustment). These estimates are based on reconstructed National Accounts and within-country inequality measures. Non-market income (e.g. through home production such as subsistence farming) is taken into account.
